AWAPLAN/AWAFLEX SBS MODIFIEDS

Whether you're building a new addition or reroofing a porch or garage, there's nothing like TAMKO® Awaplan and Awaflex® products on a flat or low-sloped roof. Unlike typical low-slope roofing materials, Awaplan and Awaflex products are exceptionally flexible. They resist punctures and tears. And they can be applied with cold-process SBS-modified adhesive, so you don't have to worry about hazardous torching equipment on your roof. Your home is probably your single largest investment. Help that investment appreciate in value by roofing with Awaplan or Awaflex products. Tested by time. Trusted by roofers.

A. Embedded Mineral Granules

Lightweight ceramic. Provide protection against traffic, weather and UV degradation. Available in a variety of colors.

B. SBS-Modified Asphalt Coating

Flexible SBS-polymer-modified bitumen. Maximum waterproofing, superior aging and elasticity/reversibility.

C. Nonwoven Polyester Mat Saturated with Roofing-Grade Asphalt

Strong, high-tensile, multidirectional resistance to punctures, thermal shock and tearing.

TAM-PRO Premium SBS Adhesive squeegee applied.
TAM-PRO M3 Adhesive spray or squeegee applied.

GOOD	Awaflex®	10-Year Limited Warranty
BETTER	Awaplan 170	12-Year Limited Warranty
BEST	Awaplan Premium	15-Year Limited Warranty

- Ideally suited for flat and low-sloped roofs. Both new construction and reroofing of additions, porches, garages, flat-roofed homes and more.
- Excellent for flashing in valleys and around chimneys and skylights.
- Awaplan and Awaflex products have exceptional elongation and tensile strength, so they won't split with roof deck movement.
- Made with a strong nonwoven polyester mat, Awaplan and Awaflex products resist punctures and tearing.
- The polyester mat is coated with asphalt modified with SBS polymer for flexibility, superior aging and waterproofing.
- Use of TAM-PRO® Premium SBS Adhesive or TAM-PRO® M3 Adhesive, also produced by TAMKO, lets you avoid the hazards of open-flame torching equipment on your roof.
