TAMKO has two lines of cements and coatings. Designed for residential, commercial, and industrial use, both lines are formulated to provide the right product for the job.
### Primers

**TAM-Pro®** primers are used as a stain barrier, to promote adhesions and to prepare the surface for coating.

| 813 TAM-Pro Quick-Dry Primer | A quick-drying low viscosity, pure asphalt-based material made with penetrating oils and petroleum solvents. Chemically inert to resist mild acids and alkalis. Provides a bond to asphalt, concrete, masonry and metal surfaces. Suitable as a bonding agent between the surface and asphaltic cements and coatings used in roofing and waterproofing applications. Adheres to porous and non-porous surfaces to maximize bonding. Coatings applied to this primer may be hot or cold, solvent-based or emulsion-based. Not for use with coal tar-based materials. | • Brush  
• Spray | BUR/Modified roofing—3/4 gallon per 100 sq. ft.  
Concrete surfaces—1/4 to 2 gallons per 100 sq. ft.  
Metal surfaces—3/4 gallon per 100 sq. ft. | UL Classified  
ASTM D441, Type I  
Miami-Dade County Approved  
Florida Building Code Approved | 10.5 oz.  
5 gal. |
| 814 TAM-Pro Low-VOC Asphalt Primer | A low VOC, pure asphalt-based material made with penetrating oils and petroleum solvents. Suitable as a bonding agent between the surface and asphaltic cements and coatings used in roofing and waterproofing applications. Adheres to porous and non-porous surfaces to maximize bonding. Coatings applied to this primer may be hot or cold, solvent-based, or emulsion-based. Not for use with coal tar-based materials. | • Brush  
• Spray | BUR/Modified roofing—3/4 gallon per 100 sq. ft.  
Concrete surfaces—1/4 to 2 gallons per 100 sq. ft.  
Metal surfaces—3/4 gallon per 100 sq. ft. | ASTM D441, Type II  
Florida Building Code Approved | 1 gal.  
5 gal. |

### Non-Fibered Coatings

**TAM-Pro® & TAMKO®** non-fibered coatings are formulated with a thin viscosity to extend the life of your roof and protect the membrane beneath the coating.

</table>
| 845 TAM-Pro Non-Fibered Emulsion Coating | A versatile coating consisting of a blend of clay, asphalt and water. Provides an additional layer against weathering for asphalt roofing systems or properly prepared metal roofs. Dries to form a surface that resists acid and alkali. Also used as a surface preparation for the application of aluminum roof coating, as well as damp-proofing of concrete and masonry surfaces and ICF (insulated concrete forms). | • Spray  
• Roofer’s brush | 2 to 4 gallons per 100 sq. ft. | ASTM D1227, Type III, Class I  
Florida Building Code Approved | 5 gal. |
| TANKO Non-Fibered Roof Coating | A thin non-fibered coating for low-slope roofs, as well as metal and masonry surfaces. Steel or wooden fences and underground pipe may also be treated. | • Brush  
• Roofer’s brush | Per 100 sq. ft.:  
Composition Roofing: 1 gallon  
Metal Surfaces: 1/4 gallon | 1 gal.  
5 gal. |
| TANKO Non-Fibered Roof and Foundation Coating | A thin-viscosity material that doubles as a non-fibered roof or foundation coating. | • Brush | Roof coating: 1 gallon per 100 sq. ft.  
Foundation Coating: 1-Coat Application: 1 gallon covers 75 to 100 sq. ft. per coat  
2-Coat Application: 1 gallon covers 150 to 200 sq. ft. per coat | ASTM D2799  
Florida Building Code Approved | 1 gal.  
5 gal. |
| TANKO Foundation Coating | A non-fibered below-grade moisture protection coating. Used for damp-proofing for exterior masonry, concrete and metal surfaces. | • Brush | 2-Coat Application: 1 gallon covers 75 to 100 sq. ft. per coat | 5 gal. |

### Fibered Coatings

**TAM-Pro® & TAMKO®** fibered coatings are formulated with a thicker viscosity to extend the life of your roof and protect the membrane beneath the coating.

| 829 TAM-Pro Fibered Roof Coating | A semi-mastic material blended with asphalt, mineral stabilizers, petroleum solvents and fibers. For use on all types of low-sloped roof surfaces, with the exception of coal tar-based materials. Also used on metal, concrete and masonry surfaces. Provides weathering protection for membrane surfaces. | • Spray  
• Roofer’s brush | BUR/Modified roofing—2 to 3 gallons per 100 sq. ft.  
Metal surfaces—1 to 1.5 gallons per 100 sq. ft.  
Concrete/Masonry—1 to 2 gallons per 100 sq. ft. | UL Classified  
ASTM D4479  
Miami-Dade County Approved  
Florida Building Code Approved | 5 gal. |

## Product Description and Uses Application

**Q-15 Tam-Pro Electronic Flashing Cement**

- **Application Methods**: Putty knife, Trowel
- **Approximate Coverage**: 1 gallon covers 12.5 sq. ft. when applied at 1/8” thickness.
- **Technical Product Information**: UL Classified
  - ASTM D5486, Type I
  - Miami-Dade County Approved
  - Florida Building Code Approved

- **Sizes**: 3 gal., 5 gal.

**Q-20 Tam-Pro Premium SBS Flashing Cement**

- **Application Methods**: Putty knife, Trowel
- **Approximate Coverage**: 1 gallon covers 12.5 sq. ft. when applied at 1/8” thickness.
- **Technical Product Information**: UL Classified
  - ASTM D5486, Type I
  - Miami-Dade County Approved
  - Florida Building Code Approved

- **Sizes**: 10.5 oz., 3 gal., 5 gal.

**801 Tam-Pro Plastic Roof Cement**

- **Application Methods**: Trowel
- **Approximate Coverage**: 1 gallon covers 12.5 sq. ft. when applied at 1/8” thickness.
- **Technical Product Information**: UL Classified
  - ASTM D5486, Type I
  - Miami-Dade County Approved
  - Florida Building Code Approved

- **Sizes**: 3 gal., 5 gal.

**803 Tam-Pro Wet or Dry Surface Plastic Roof Cement**

- **Application Methods**: Putty knife, Trowel
- **Approximate Coverage**: 1 gallon covers 12.5 sq. ft. when applied at 1/8” thickness.
- **Technical Product Information**: UL Classified
  - ASTM D5486, Type I
  - Miami-Dade County Approved
  - Florida Building Code Approved

- **Sizes**: 3 gal., 5 gal.

**808 Tam-Pro Cold Applicaton Cement**

- **Application Methods**: Squeegee, Brush
- **Approximate Coverage**: Cold Method: 1 gallon covers 50 sq. ft., Lap cement: 1 gallon covers 396 linear ft.
- **Technical Product Information**: UL Classified
  - ASTM D3019, Type III
  - Miami-Dade County Approved
  - Florida Building Code Approved

- **Sizes**: 3 gal.

**801 Tamko Plastic Roof Cement**

- **Application Methods**: Putty knife, Trowel
- **Approximate Coverage**: 1/16” thickness
  - 1 gallon covers 12.5 square feet
- **Technical Product Information**: UL Classified
  - ASTM D5486, Type I
  - Miami-Dade County Approved
  - Florida Building Code Approved

- **Sizes**: 1 gal., 5 gal.

**803 Tamko Wet or Dry Surface Plastic Roof Cement**

- **Application Methods**: Putty knife, Trowel
- **Approximate Coverage**: 1/16” thickness
  - 1 gallon covers 12.5 square feet
- **Technical Product Information**: UL Classified
  - ASTM D5486, Type I
  - Miami-Dade County Approved
  - Florida Building Code Approved

- **Sizes**: 1 gal., 5 gal.

**Tamko Cold Method and Lap Cement**

- **Application Methods**: Brush
- **Approximate Coverage**: Cold Method: 1 gallon covers 50 square feet
  - Lap Cement: 1 gallon covers 106 linear feet
- **Technical Product Information**: UL Classified
  - ASTM D3009, Type III
  - Miami-Dade County Approved
  - Florida Building Code Approved

- **Sizes**: 1 gal., 5 gal.
