Prior to making your final color selection, TAMKO recommends viewing an actual roof installation of the same shingle color and manufacturing plant you are considering for the full impact of color blending and patterns. As colors vary by region, you may want to visit www.tamko.com and view colors available by ZIP code. A house photograph in the marketplace may have been digitally altered or photoshopped. TAMKO does not guarantee that this particular color, and the installation in this photograph, will look the same on your home. As a consumer, you understand that the roof color you choose may be slightly different from the color you see in this photograph. Prior to installing the shingles, open a bundle and view a few of the shingles to be certain it is the color you selected. TAMKO will not be responsible for color claims once the shingles are installed on a roof.
