When to use:
- page up to 6 inches = 1 inch
- page up to 12 inches = 1.5 inch
- page up to 18 inches = 2 inch
- page over 18 inches = 2.5 inch

TAMKO red is PMS 185, which according to the logo standards breaks down to be M100, Y80. All logos are cm yk. If needed, TAMKO red is PMS 185.

TAMKO red is the color used for the base slab and the protection course. The waterproofing membrane is TW-60, and the sealant is urethane. Stainless steel clamping rings are used to secure the components. The protection course extends no less than 6" past the hula skirt. Urethane sealant is used to seal around both the base and topping slabs along the radius of the pipe. The waterproofing membrane also acts as a target sheet that extends no less than 6" past the hula skirt. A sealant cant is used for sealing purposes.

*Use TWP-2 only when priming a PVC pipe.
