**DESCRIPTION**

**TAMKO® SA BASE** is a flexible, fiberglass reinforced, self-adhering, SBS modified asphalt membrane with a polymer film on the surface and a removable split release film on the adhesive side.

- Fiberglass reinforcement.
- Self-adhering.
- TAMKO® SA Roofing System 15-year Limited Warranty and Arbitration Agreement.

**USES:** TAMKO® SA BASE is used in TAMKO® SA roofing system, when used in conjunction with TAMKO® SA CAP Sheet. SA BASE can be used as a roofing base sheet that can be applied by removing the split release film from the adhesive side and pressing the base sheet's self-adhesive back surface into place. Alternate nail application is available online at tamko.com.

**TECHNICAL INFORMATION**

UL Classified Base Sheet

Independently tested for compliance with: ASTM D1970

UL Evaluation Reports: UL ER3225-01

Florida Building Code Approved FL17491

Miami Dade County Product Control Approved

**IMPORTANT SAFETY INFORMATION:** Do not install until all appropriate safety precautions have been read and understood. The TAMKO Safety Data Sheet (SDS) is available at tamko.com/sds. Always use appropriate fall protection equipment and wear appropriate personal protective equipment (PPE) when working with this product. Moisture, frost, debris or other material will decrease the traction and can cause slippery conditions when walking on the product. Applicator safety is of utmost importance.

**WARNING:** This product contains crystalline silica. Crystalline silica has been classified as “known” human carcinogen by the International Agency for Research on Cancer (IARC) and the National Toxicology Program. This product also contains oxidized asphalt. Occupational exposures to oxidized asphalt and its emissions during roofing have been classified by IARC as a ‘probable human carcinogen’. Oxidized asphalt also contains Polycyclic Aromatic Hydrocarbons some of which have been classified by IARC as known or probable human carcinogens. The physical nature of this product may help limit any inhalation or dermal hazard during application and/or removal. However, physical forces such as sawing, grinding or drilling demolition work and heating or burning may increase the inhalation or dermal exposure hazard of this product. Take precautions to prevent breathing and contact with skin.
