TW-THRU WALL FLASHING

SELF-ADHERING SHEET MEMBRANE

**DESCRIPTION**

TW-THRU WALL FLASHING is a flexible self-adhering sheet membrane consisting of a self-adhering rubberized asphalt and an 8-mil polymer film as the top surface.

- Rubberized asphalt sheet has high adhesive quality
- Treated release film for ease of installation
- Available in factory precut widths of 12", 18", 24" and 36" rolls
- 5-Year Limited Warranty and Arbitration Agreement

**USES:** Used as an in-wall flashing membrane for use with concrete, masonry, gypsum, felt-faced and foil-faced polyisocyanurate foam insulation or wood construction.

**LIMITATIONS**

- TW-THRU WALL FLASHING cannot be left exposed to sunlight longer than 60 days
- Membrane must be applied when air, substrate and membrane temperatures are above 40°F
- Membrane should not be brought into contact with products containing coal-tar pitch
- Not intended for use on roofs or prolonged exposure to temperatures above 200°F

**PRODUCT DATA**

**IMPRESSIVE SAFETY INFORMATION:**

**WARNING:** This product contains crystalline silica. Crystalline silica has been classified as “known human carcinogen” by the International Agency for Research on Cancer (IARC) and the National Toxicology Program. The National Institute for Occupational Safety and Health has concluded that the fumes of heated roofing asphalt are potential occupational carcinogen. The physical nature of this product may help limit any inhalation or dermal hazard during application and/or removal. However, physical forces such as sawing, grinding or drilling during demolition work and heating or burning may increase the inhalation or dermal exposure hazard of this product. Take precautions to prevent breathing and contact with skin.
