1. CHEMICAL PRODUCT AND COMPANY IDENTIFICATION
TRADE NAME: TAM-PRO 845 Non-Fibered Emulsion Coating
LABEL: TAM-PRO
USE & DESCRIPTION: Roof Coating
CHEMICAL FAMILY: Asphalt Mixture

MANUFACTURED BY:
TAMKO Building Products, Inc.
P. O. Box 1404
Joplin, MO 64802-1404
www.TAMKO.com

EMERGENCY TELEPHONE NUMBERS;
General Information: 1-417-624-6644 (8 a.m. - 5 p.m. CST)
Chemtrec: 1-800-424-9300 (24 HOURS)

2. HAZARDS IDENTIFICATION
SIGNAL WORD: Danger
GHS CLASSIFICATION:
Carcinogenicity – Category 1A
Skin Irritation – Category 2
Eye Irritation – Category 2B

HAZARD STATEMENTS:
May cause cancer.
Causes skin and eye irritation.
Additional hazard information: Can cause silicosis and other permanent lung damage.
PRECAUTIONARY STATEMENTS:
Prevention
Obtain special instructions before use. Do not handle until all safety precautions have been read and understood.
Wash hands and exposed skin thoroughly after handling. Wear protective gloves/protective clothing/eye protection/face protection.
Response
If on skin: Wash with plenty of water. Get medical advice/attention: If exposed or concerned or you feel unwell, if eye and or skin irritation persists.
Specific treatment: See section 4-First Aid In case of fire: See Section 5.
Take off contaminated clothing and wash before reuse.
If in eyes: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

Storage
Store locked up.
Disposal
Dispose in accordance with Federal, State, and Local regulations. (See section 13 for additional information).

3. COMPOSITION/INFORMATION ON INGREDIENTS

</tbody>
</table>

4. FIRST AID MEASURES
EYE CONTACT: Immediately flush eyes with plenty of cool water for at least 20 minutes, occasionally lifting the eye lids to ensure thorough rinsing. Get medical attention if irritation persists.
SKIN CONTACT: Clean any exposed skin with warm soapy water if possible. If not, and a waterless hand cleaner is used, it should be without pumice. Do not use solvents or thinners to remove material from skin. Get medical attention if irritation persists or develops.
INGESTION: If swallowed, do not induce vomiting. If vomiting occurs, keep head lower than hips to avoid aspiration of vomit into the lungs which can cause inflammation or pneumonitis. Call poison control center or get immediate medical attention.
INHALATION: If inhalation of cured product particles, fumes, vapors, or mist occurs, remove person to fresh air. Drink water to clear throat or blow nose to clear. If not breathing, give artificial respiration or give oxygen by trained personnel and get immediate medical attention.
NOTES TO PHYSICIAN: Treatment should be based on removing the source of irritation with treatment of symptoms as necessary.

5. FIRE FIGHTING MEASURES
EXTINGUISHING MEDIA: Dry chemical, CO₂, or universal type foam fire extinguisher should be used and water fog. Do not use straight-stream water.
SPECIAL FIRE FIGHTING PROCEDURES: Firefighters should not enter confined spaces without wearing a National Institute for Occupational Safety and Health (NIOSH) approved positive pressure breathing apparatus (SCBA) with full face mask and full protective equipment. Water may be used to cool containers in a fire-exposed area.
UNUSUAL FIRE OR EXPLOSION HAZARDS: When heated, fumes may burn if ignition source is provided. Petroleum asphalt fumes can explode if emitted in an enclosed environment and supplied with an ignition source. Burning product may cause thick black smoke. Containers exposed to intense heat from fires should be cooled with water to prevent vapor pressure buildup which could result in container rupture. SEE SECTION 10 FOR COMBUSTION PRODUCTS.
6. ACCIDENTAL RELEASE MEASURES

PRECAUTIONS IF MATERIAL IS SPILLED OR RELEASED: Remove ignition sources, ventilate area, and avoid inhalation, eye or skin contact by using appropriate precautions outlined in this SDS (see Section 8). Stop leak and contain spilled material with absorbent material. Collect adsorbed product and clean up materials in appropriate container for proper disposal. Move containers from spill area. For larger spills, keep unnecessary people away. Stay upwind of and away from spill. Notify proper authorities. Prevent materials from entering drains, sewers, or waterways. Spills entering surface waters or sewers entering/leading to surface waters that cause a sheen must be reported to the National Response Center 1-800-424-8802.

WASTE DISPOSAL METHODS: Dispose in accordance with applicable Federal, State, and Local regulations. Do not burn.

7. HANDLING AND STORAGE

STORAGE TEMPERATURE: Store away from heat and all ignition sources and open flames in accordance with applicable laws and regulations. THIS PRODUCT SHOULD NOT BE HEATED OR BURNED USING A DIRECT FLAME DEVICE.

PRECAUTIONS TO BE TAKEN IN HANDLING AND STORING: Follow recommended work practices and use recommended personal protective clothing and equipment. See Section 8 of this SDS. Avoid all ignition sources. Storage areas should be ventilated to reduce fire and explosion hazards, and possible overexposure of personnel to fumes and vapors. Keep containers closed when not in use. Do not store near heat, sparks, flame, strong oxidants, food and beverages or smoking materials. Empty containers retain residue (liquid and/or vapor) and can be dangerous. DO NOT PRESSURIZE, CUT, WELD, BRAZE, SOLDER, DRILL, GRIND OR EXPOSE SUCH CONTAINERS TO HEAT, FLAME, SPARKS, OR OTHER SOURCES OF IGNITION. THEY MAY EXPLODE AND CAUSE INJURY OR DEATH. Do not attempt to clean since residue is difficult to remove. For work on tanks, refer to OSHA regulations, ANSI Z49.1, and other governmental and industrial references pertaining to cleaning, repairing, welding or other contemplated operations. See Section 13 for disposal.

NE= Not established.

Note: Due to the form of the product, hazardous exposures from this product are not expected to occur. Gloves must be worn when handling and adequate ventilation must be provided during roofing related activities.

** Total Nuisance Dust/Respirable Dust.

RESPIRATORY PROTECTION: Normally not needed in well-ventilated areas. If applicable exposure standards are exceeded or can be exceeded, use a NIOSH approved air-purifying respirator. If concentrations are sufficiently high that this respirator is inadequate, or high enough to cause oxygen deficiency, use a positive pressure self-contained breathing apparatus (SCBA). Follow all applicable respirator/SCBA use, fitting, training standards, and regulations.

VENTILATION: Use only with adequate ventilation to maintain exposures below applicable exposure limits. Local exhaust ventilation and/or enclosure of the process may be required. All equipment must be explosion proof.

EYE PROTECTION: Chemical safety goggles with side-shields or face shield must be used if eye contact is possible.

SKIN: Chemical resistant gloves, apron, or other protective clothing needed to prevent skin contact.

9. PHYSICAL AND CHEMICAL PROPERTIES

| Appearance and Odor: | A brown heavy consistency asphalt emulsion with a slight petroleum odor. |
| Odor Threshold | No Data Available |
| pH | 7.0 – 10.0 |
| Boiling Point: | 212 °F |
| Melting Point: | No Data Available |
| Flash Point: | Not Applicable |
| Autoignition Temperature: | >400 °F |
| Viscosity: | No Data Available |
| Decomposition Temperature: | No Data Available |

| Upper/Lower Flammability or Explosive Limits: | Not Applicable |
| Vapor Pressure: | Approximately 60mm Hg @ 100 °F |
| Vapor Density (Air = 1): | No Data Available |
| Specific Gravity/Relative Density: | Approximately 1.0 |
| Solubility (IES): | Negligible |
| Initial Boiling Point and Boiling Range: | No Data Available |
| Evaporation Rate (Butyl Acetate = 1): | No Data Available |
| Flammability(Solid and Gas): | Not Applicable |
| Partition Coefficient: N-Octanol/Water: | No Data Available |

10. STABILITY AND REACTIVITY

STABILITY: Stable

REACTIVITY: Non-reactive.

CONDITIONS TO AVOID: Keep from heat, sparks, open flame and other sources of ignition. Avoid contact with strong oxidizing agents. Prevent vapor accumulation. THIS PRODUCT SHOULD NOT BE HEATED OR BURNED USING A DIRECT FLAME DEVICE.

HAZARDOUS REACTION: Polymerization will not occur.

INCOMPATIBILITY (MATERIALS TO AVOID): Strong oxidizing agents.

HAZARDOUS COMBUSTION PRODUCTS: Carbon monoxide, carbon dioxide, oxides of sulfur.
11. TOXICOLOGICAL INFORMATION

**EYE** – Can cause eye irritation.
**SKIN** – Can cause skin irritation.
**INHALATION** – Cured product particles, fume, vapor, or mist may cause upper respiratory irritation.
**INGESTION** – May cause harmful effects if swallowed.

THE FOLLOWING COMPONENT DATA IS PROVIDED FOR USER INFORMATION:

**SILICA**

*Cancer* - This product contains crystalline silica (quartz). IARC has determined that crystalline silica inhaled in the form of quartz from occupational sources is carcinogenic to humans (Group 1). IARC concluded that there was sufficient evidence in humans and animals for the carcinogenicity of inhaled crystalline silica in the form of quartz from occupational sources. The NTP has classified silica as known to be a human carcinogenic. The physical nature of this product may help limit any inhalation hazard from crystalline silica during application and in its hardened state. However, physical forces such as sawing, grinding, drilling and other demolition work on this product may liberate crystalline silica dust.

**Acute Effects** - Exposure to silica dust can cause irritation of the eyes, nose and throat. Exposure to high concentrations can also cause Accelerated Silicosis causing progressive shortness of breath, fever, coughing, and weight loss.

**Chronic Effects** – In addition to cancer, breathing of silica over a period of time can cause damage to the lung tissue or silicosis after long exposure at low concentrations causing shortness of breath, fever, coughing, and weight loss. Prolonged and repeated exposure to respirable silica-containing dust may cause autoimmune disease, kidney disease, tuberculosis, and nonmalignant respiratory disease, and bronchitis.

**HEXAVALENT CHROMIUM**

*Cancer* - This product contains a hexavalent chromium compound. IARC has determined that chromium (VI) compounds are carcinogenic to humans (Group 1). The NTP has classified chromium hexavalent compounds as known to be a human carcinogenic. Inhalation is the primary route for occupational exposure. The physical nature of this product may help limit any inhalation and/or dermal contact hazard from hexavalent chromium during application and in its hardened state. However, physical forces such as sawing, grinding, drilling and other demolition work on this product may liberate hexavalent chromium dust. Ingestion of this product is unlikely and should be avoided.

**Acute Effects** - Exposure to hexavalent chromium can cause severe irritation of the eyes, nose, throat, and skin. Ingestion of hexavalent chromium can cause severe tissue destruction, including kidney and liver damage, and may result in death.

**Chronic Effects** – Prolonged or repeated eye contact with hexavalent chromium may cause inflammation, burns, or blindness. Prolonged or repeated skin contact, especially with broken skin, may cause ulcers or chrome sores. Prolonged or repeated breathing of dust or mists with hexavalent chromium may ulcerate and perforate the nasal septum, chronic rhinitis, pharyngitis, inflammation of the larynx, liver and kidney damage, and increased risks of developing nasopharyngeal cancer and lung cancer.

**ASPHALT**

*Cancer* - This product contains cutback asphalt. In 1987 IARC classified "extracts of steam and air-refined bitumens" (cutback asphalt) as Group 2B, "possibly carcinogenic to humans." In 2011 IARC did not specifically classify cutback asphalt as Group 2B. NIOSH has also concluded that the fumes of heated roofing asphalt are a potential occupational carcinogen. Asphalt may also cause irritation of the respiratory tract. The physical nature of this product may help limit any inhalation hazard from asphalt after curing. However, physical forces such as sawing, grinding, drilling and other demolition work on this product may liberate cured product particles containing asphalt. Burning or heating of the product may cause fumes, vapors or mists.

**Acute Effects** - Inhalation of cured product particles, fumes, vapors, or mist may cause nose, throat, and mucous membrane irritation. Eye contact may cause severe irritation, redness, tearing, and blurred vision. If ingested, may cause mouth, throat and gastrointestinal tract irritation and upset with possible nausea, vomiting and diarrhea.

**Chronic Effects** - In addition to cancer, prolonged or repeated skin contact may result in dryness and irritation of the skin. Long term skin exposure to asphalt can increase sensitivity to the sun, and may cause discoloration. Asphalt may also cause irritation of the respiratory tract.

12. ECOLOGICAL INFORMATION

Ecotoxicity – No specific data available on this product. Persistence and degradability – No data available. Bioaccumulative potential – No data available. Mobility in Soil – No data available. Other adverse effects (GHG, Ozone) - No data available.

13. DISPOSAL CONSIDERATIONS

Dispose in accordance with Federal, State, and Local regulations. Prevent materials from entering drains, sewers, or waterways. Do not dump on the ground. Do not burn.

14. TRANSPORT INFORMATION

**DOT PROPER SHIPPING NAME:** Elevated Temperature Liquid N.O.S.

**DOT HAZARD CLASSIFICATION:** N.O.S. 0, not hazardous for DOT transport.

**DOT LABELING REQUIREMENTS:** None.

**UN/NA NUMBER:** UN 3257

**PACKING GROUP:** PG III

**IMDG CODE:** Not hazardous for vessel transport under the IMDG Code
15. REGULATORY INFORMATION
TOXIC SUBSTANCES CONTROL ACT (TSCA): Some components in this product are listed on the TSCA Inventory.
COMPREHENSIVE ENVIRONMENTAL RESPONSE, COMPENSATION AND LIABILITY ACT (CERCLA): None
SUPERFUND AMENDMENTS AND REAUTHORIZATION ACT OF 1986 (SARA), TITLE III:
   Section 302 Extremely Hazardous Substances: None
   Section 311/312 Hazard Categories: Immediate Health; Delayed Health; Fire Hazard
   Section 313 Reportable Ingredients: None.
